

Docket No. AUS920030976US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND APPARATUS FOR MAINTAINING BROWSER NAVIGATION
RELATIONSHIPS AND FOR CHOOSING A BROWSER WINDOW FOR NEW
DOCUMENTS**

A method, apparatus, and computer instructions for managing the display of a new document. In response to receiving a user input indicating that the new document is to be displayed, a list of browser windows including an indication of a presently displayed document in each respective browser window in the list of browser windows is displayed; and a document displayed in the browser window is replaced with the new document responsive to a user selection of a browser window from the list of browser windows.
